Go Mobile PGH

Let's go!

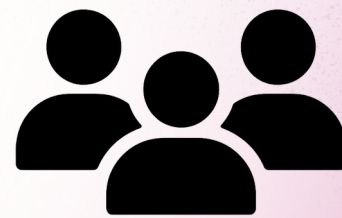

Go Mobile PGH: What is it?

A mobile application for paid street parking in Pittsburgh.

Function

Allows users to select a parking zone, choose a vehicle, set parking duration, and make digital payments.

Target Users

Commonly used by commuters, students, residents, and visitors.

Features

Tracks session times, and sends reminders when parking is about to expire.

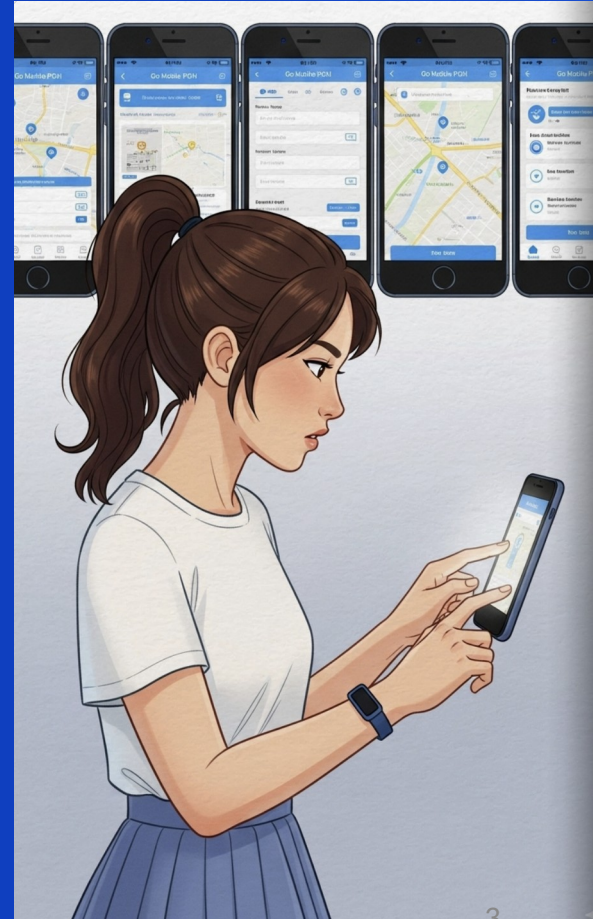

Meet Alex!

She is running late to class

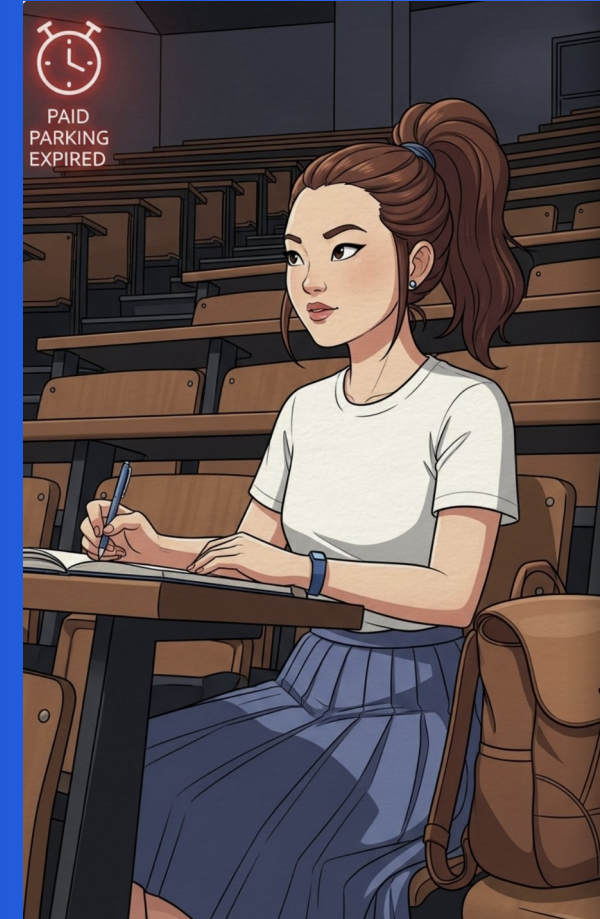

Gets flustered with all of the screens

Selects the same information every day

Rushes, forgetting to check the duration

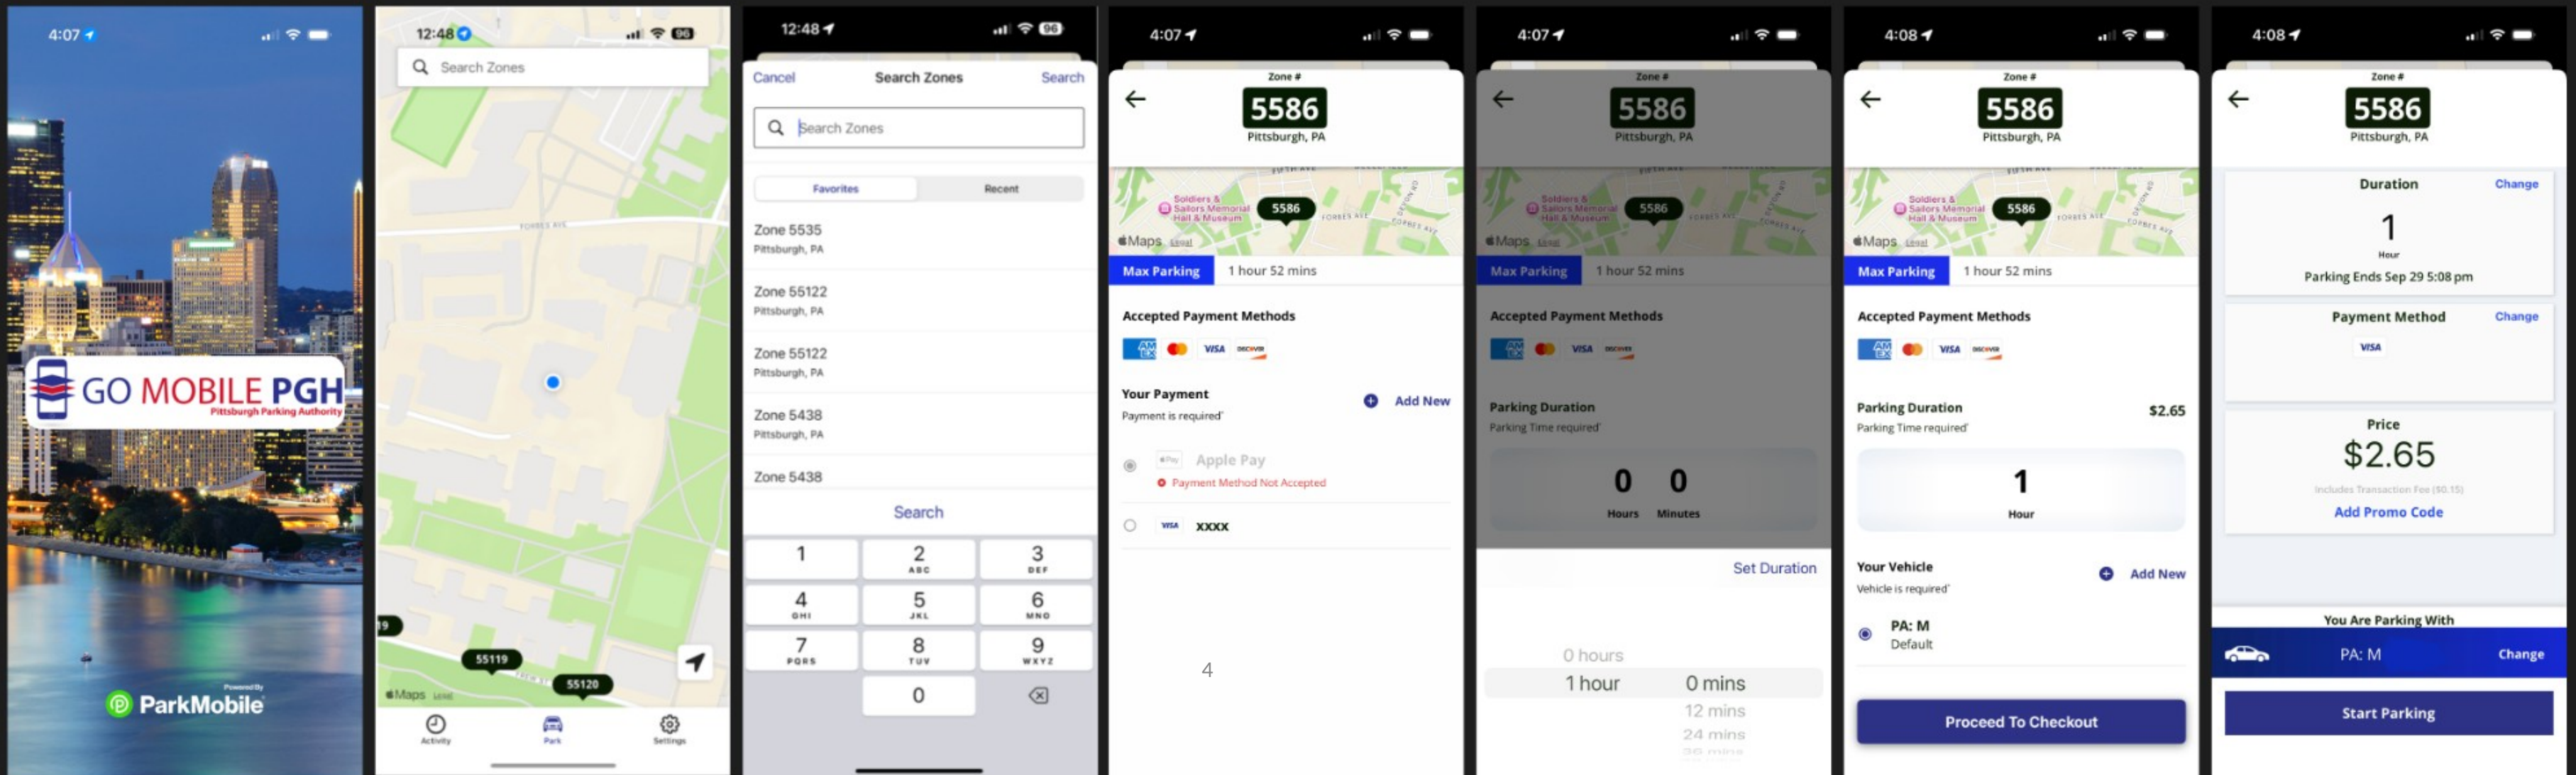

Arrives late to class because of parking

Received a ticket because she was flustered

Worst Case:

Our AUI:

Number of Screens: 1

Best Case: 1 clicks

Worst Case: 6 clicks

Still able to edit
location and
details!

Default Preferences System

- **Feasibility:** ParkMobile already stores this data, vehicles, saved cards, and session lengths.

4:00

< Back Edit Vehicle Save

License Plate Number

State/Province

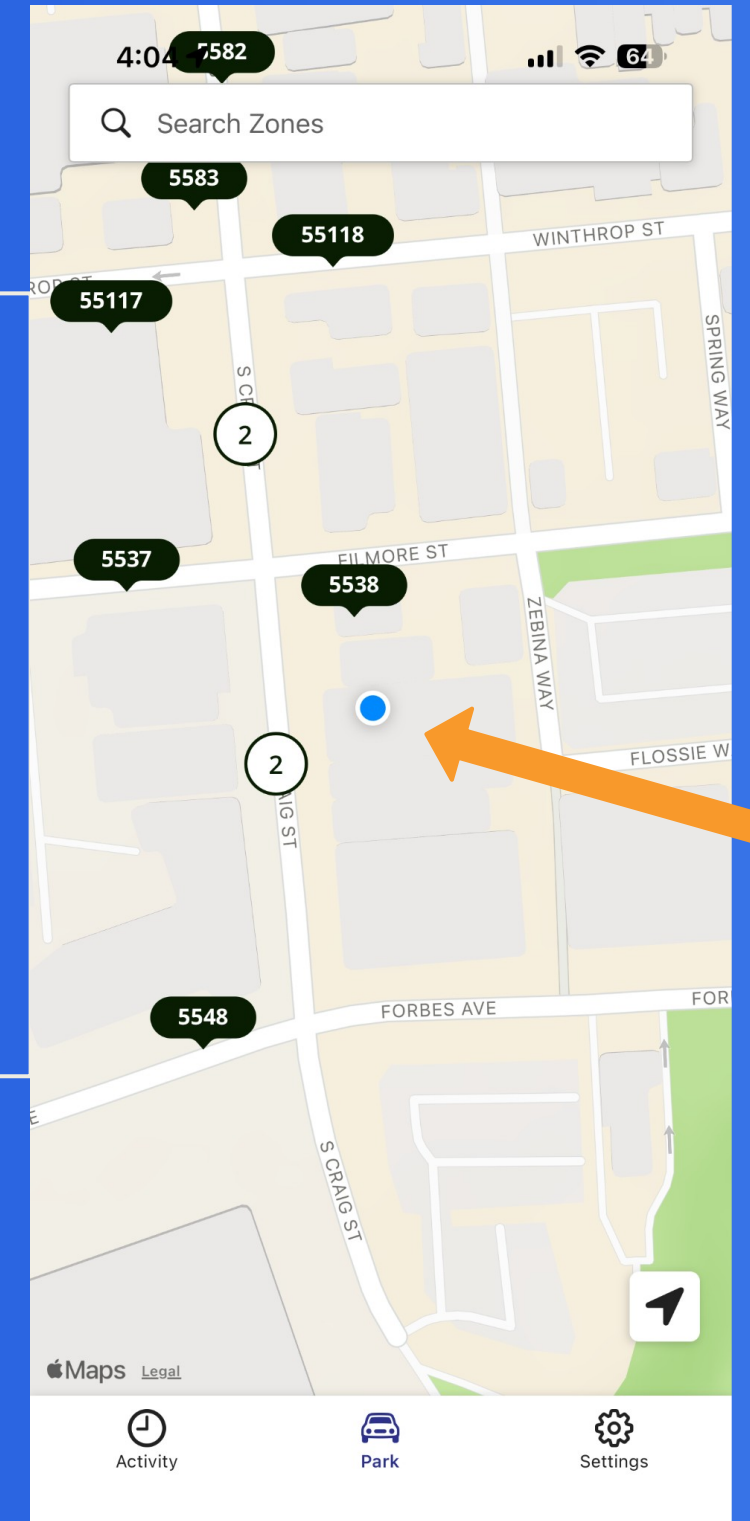

Pennsylvania - US

Nickname (Optional)

Default Vehicle ☒

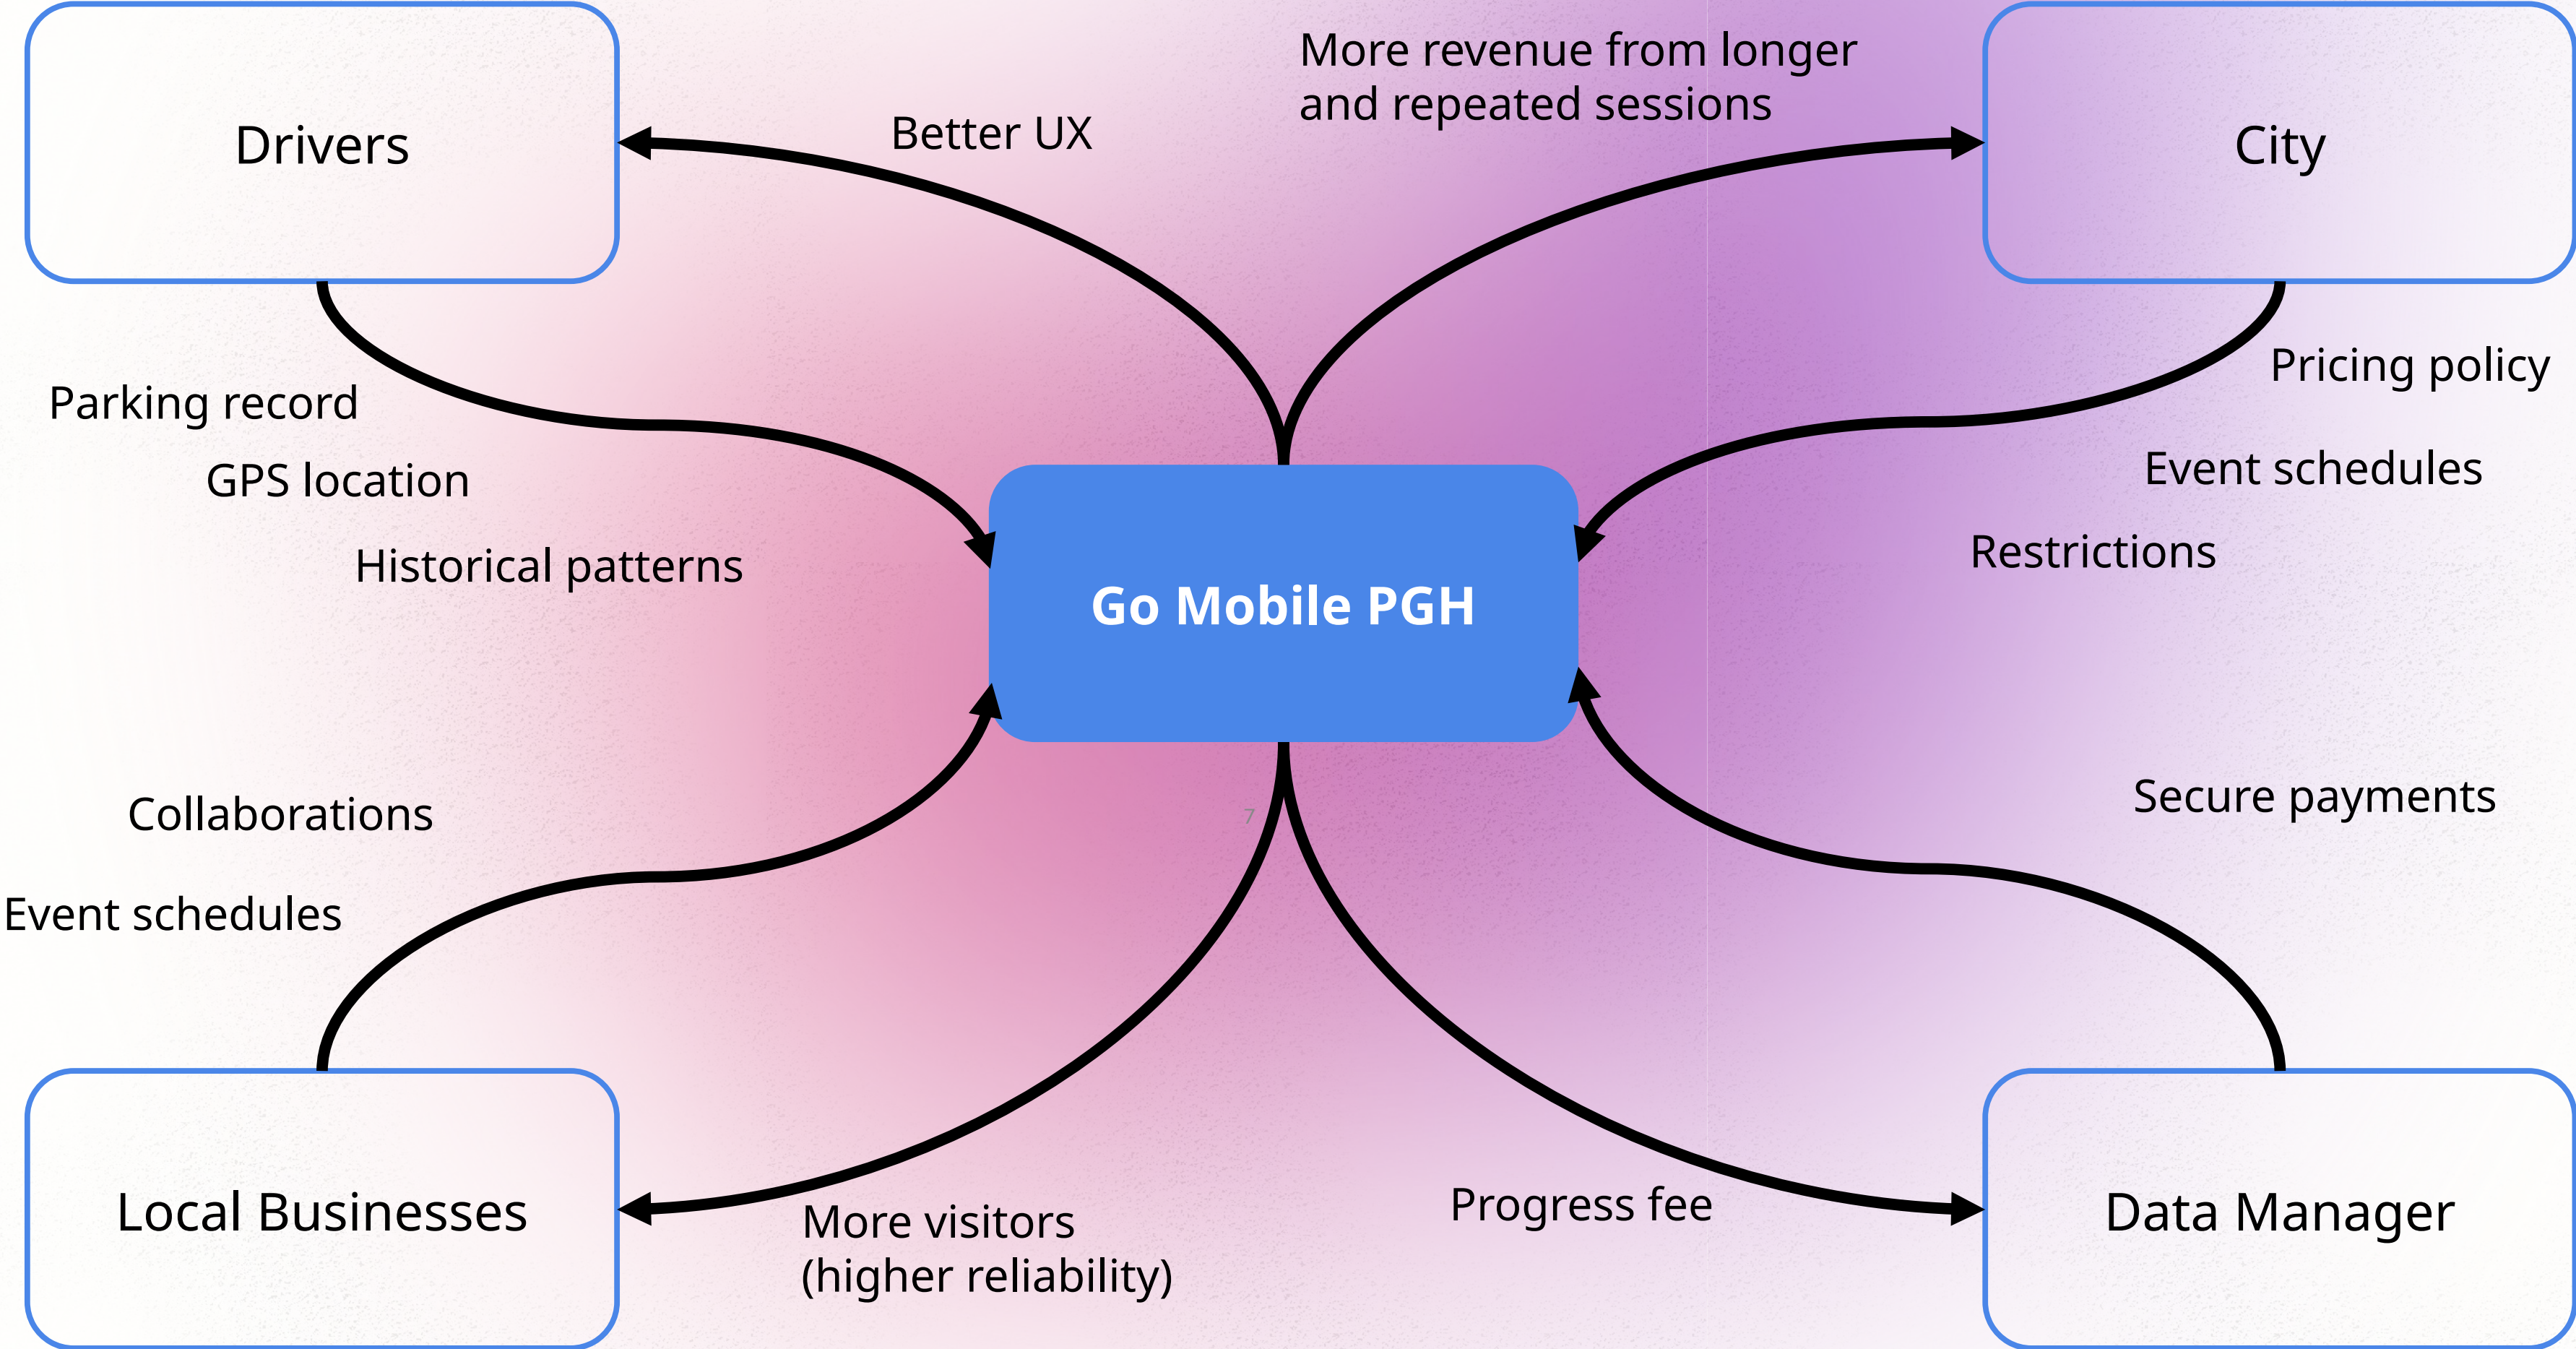

Location-Based Zone Detection

- **Feasibility:** The app already uses location data to display zones on the map.

No changes to security, payment, or account systems.

Value Flow Model

FATE Analysis

Fairness

AUI applies to all users without targeting any specific group.

Accountability

Pittsburgh Parking Authority is responsible for incorrect data, but AI developer is responsible for incorrect recommendations.

Transparency

Users can clearly review all pre-filled information and edit it as needed.

Ethics

The AUI will utilize location information that the user has already shared with the platform.

Thank you!
